NEW

QA3 Patient Trolley System

Whether for Theatre, Accident & Emergency or any other hospital department or clinical area, the QA3 Variable Height Patient Trolley System is a compact, light weight and manoeuvrable patient trolley designed to combine maximum patient comfort and maximum ease of use for practitioners.

New **QA3 DRIVE** options include an inbuilt motorised drive, powered functions and Knee**Flex** leg positioning – read on for more details.

QA3 Patient Trolley

The QA3 version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas. Designed for maximum patient comfort, the trolley is supremely manoeuvrable, compact, light weight and robust.

3 YEARS

3 YEAR WARRANTY
Terms and Conditions apply

QA3 Emergency Trolley

A specially designed version of the QA3 for Accident & Emergency departments is available. This includes an X-ray translucent platform, a medirail and the K8 pressure care mattress. Optional features include a monitor shelf and a Venturi suction system.

AneticAid

Innovative technology – practically applied

Anetic Aid is a world leading designer and manufacturer of medical devices used extensively for patient transport, treatment and recovery.

Renowned for innovation and high quality we work closely with clinicians to continuously develop and improve our products to help medical teams provide the best experience possible for their patients.

Our offer includes a broad range of equipment including surgical and patient transport trolley systems, tourniquets, theatre furniture, operating table accessories and surgical instruments.

QA3 Patient Trolley | QA3 DRIVE Patient Trolley | QA3 DRIVE Powered Patient Trolley

QA3 Emergency Trolley | QA3 DRIVE Emergency Trolley | QA3 DRIVE Powered Emergency Trolley

With its commitment to using the latest technology and materials for maximum functionality, the company is proud to be launching the latest evolution of its QA3 Patient Trolley System.

New options include an inbuilt motorised drive and electronic positioning – including KneeFlex – and all models are ideal for patient transport, examination and intubation. There are also specialist versions available for radiography in theatre and emergency areas. All are designed for maximum ease of use combined with superior patient comfort.

The QA3's compact construction is light weight yet robust, and its advanced steering system makes it supremely manoeuvrable and easily guided by one person: the new option for an inbuilt motorised drive operated by touch sensitive pushing handles is completely unique.

With the backrest raised, it is little more than 1.8m long and it descends lower and is narrower and shorter than nearly all other patient trolleys on the market. It descends to an exceptionally low height, while unique foldaway side rails store away under the mattress footprint to give a virtually zero transfer gap.

In non-powered models, the backrest is gas assisted for easy lifting and in all versions, the Trendelenburg (and reverse Trendelenburg) tilt can be operated instantly at any height from the head end.

QA3
Patient Trolley

Code: 21110

FEATURES

The QA3 Patient Trolley (Code: 21110)**: ideal for patient transport, examination and intubation in theatre and clinical areas.**

Trendelenburg tilt 1 extremely smooth and controlled mechanism, allows rapid Trendelenburg to be achieved even when trolley is at its lowest height

Pushing handles 9 four ergonomically positioned pushing handles give supreme manoeuvrability either with the patient lying flat or sitting up

Fixed transfusion pole 2 innovative quick release safety locking mechanism, integrates into either head or foot end of side rails for easy access and storage

Vertically operated side rails 3 store away under the mattress giving a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation

Hydraulic lift mechanism 4 exceptional low height capability, adjusted by means of independently operating pedals located on both sides of the trolley

Castors 5 polyurethane tyres offer low rolling resistance for high manoeuvrability, 150mm castors fitted as standard, 200mm optional

5th wheel steering 6 unique mechanism which ensures trolley is highly manoeuvrable and easily guided by one person

Gas assisted backlift 7 unique design, precision controlled, easy lift system for enhanced user and patient comfort

Cylinder trough 8 side loading for ease of access, suitable for a wide range of cylinder options including F, E or D

QA3 DRIVE

Patient Trolley

Code: 21112

FEATURES

The QA3 DRIVE Patient Trolley (Code: 21112) **has a new inbuilt motorised drive and is supremely manoeuvrable, compact, light weight and robust.**

Trendelenburg tilt 1 extremely smooth and controlled mechanism, allows rapid Trendelenburg to be achieved even when trolley is at its lowest height

NEW Pushing handles 11 totally innovative touch sensitive design to activate inbuilt motorised drive and move trolley forward or back

NEW Inbuilt motorised drive 2 works with 5th wheel steering to offer superb manoeuvrability and controlled, effortless travel up to gradients of 10°

Fixed transfusion pole 3 innovative quick release safety locking mechanism, integrates into either head or foot end of side rail for easy access and storage

Vertically operated side rails 4 store away under the mattress giving a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation

Castors 5 polyurethane tyres offer low rolling resistance for high manoeuvrability, 150mm castors fitted as standard, 200mm optional

Gas assisted backlift 6 unique design, precision controlled, easy lift system for enhanced user and patient comfort

Cylinder trough 7 side loading for ease of access, suitable for a wide range of cylinder options including F, E or D

Infection control 8 smooth moulded surfaces and acrylic capped vac formings enclose the trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design ensure the product is easy to clean

K8 pressure care mattress 9 manufactured from temperature-sensitive gel feel foam that moulds to the patient's body shape, relieving pressure by distributing the load as evenly as possible. Developed with the flexible properties of lycra, this outer material is anti-microbacterial, water resistant, vapour permeable and latex free

Patient comfort 10 exceptional low height capability and store away side rails allow easy mount/dismount particularly for elderly patients. Wider patient platform and pressure care mattress ensure maximum patient comfort. Improved ground clearance allows better access for patient hoists

QA3 DRIVE

Powered Patient Trolley

Code: 21114

FEATURES

The QA3 DRIVE Powered KneeFlex Patient Trolley (Code: 21112) **has all the benefits of the QA3 Drive – plus electrically powered functions including a 'KneeFlex' facility for additional patient comfort**

NEW Positive feel push button controls ❶ for electrically powered functions

NEW CPR button ❷ automatically positions trolley flat for CPR

NEW KneeFlex ⑫ smooth electrically powered KneeFlex position for additional patient comfort

NEW Inbuilt motorised drive ❸ works with 5th wheel steering to offer superb manoeuvrability and controlled, effortless travel up to gradients of 10°

NEW Pushing handles ❹ totally innovative touch sensitive design to activate inbuilt motorised drive and move trolley forward or back

NEW Electrically powered backlift ❺ unique design, precision controlled, for enhanced user and patient comfort

NEW Electrically powered raise and lower mechanism ❻ exceptional low height capability

Trendelenburg tilt ❼ extremely smooth and controlled mechanism, allows rapid Trendelenburg to be achieved even when trolley is at its lowest height

Vertically operated side rails ❽ store away under the mattress giving a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation

Fixed transfusion pole ❾ innovative quick release safety locking mechanism, integrates into either head or foot end of side rails for easy access and storage

Cylinder trough ❿ side loading for ease of access, suitable for a wide range of cylinder options including F, E or D

Castors ⓫ polyurethane tyres offer low rolling resistance for high manoeuvrability, 150mm castors fitted as standard, 200mm optional
